SSB: 14270,7270 kHz; PSK: 14070, 7035 kHz; CW: 14040 kHz

QSLs via W6AJF w/S.A.S.E.

Point Reyes is the windiest place on the Pacific Coast and the second foggiest place on the North American continent. The lighthouse, built in 1870 and retired in 1975, is now under management by the National Park Service. It is the one of the few lighthouses in the U. S. which have the original Fresnel lens and clockwork mechanism in working order.
